Current Smoking Among Adults (Age ≥ 18) With a Past Year Behavioral Health (BH) Condition: NSDUH, 2021

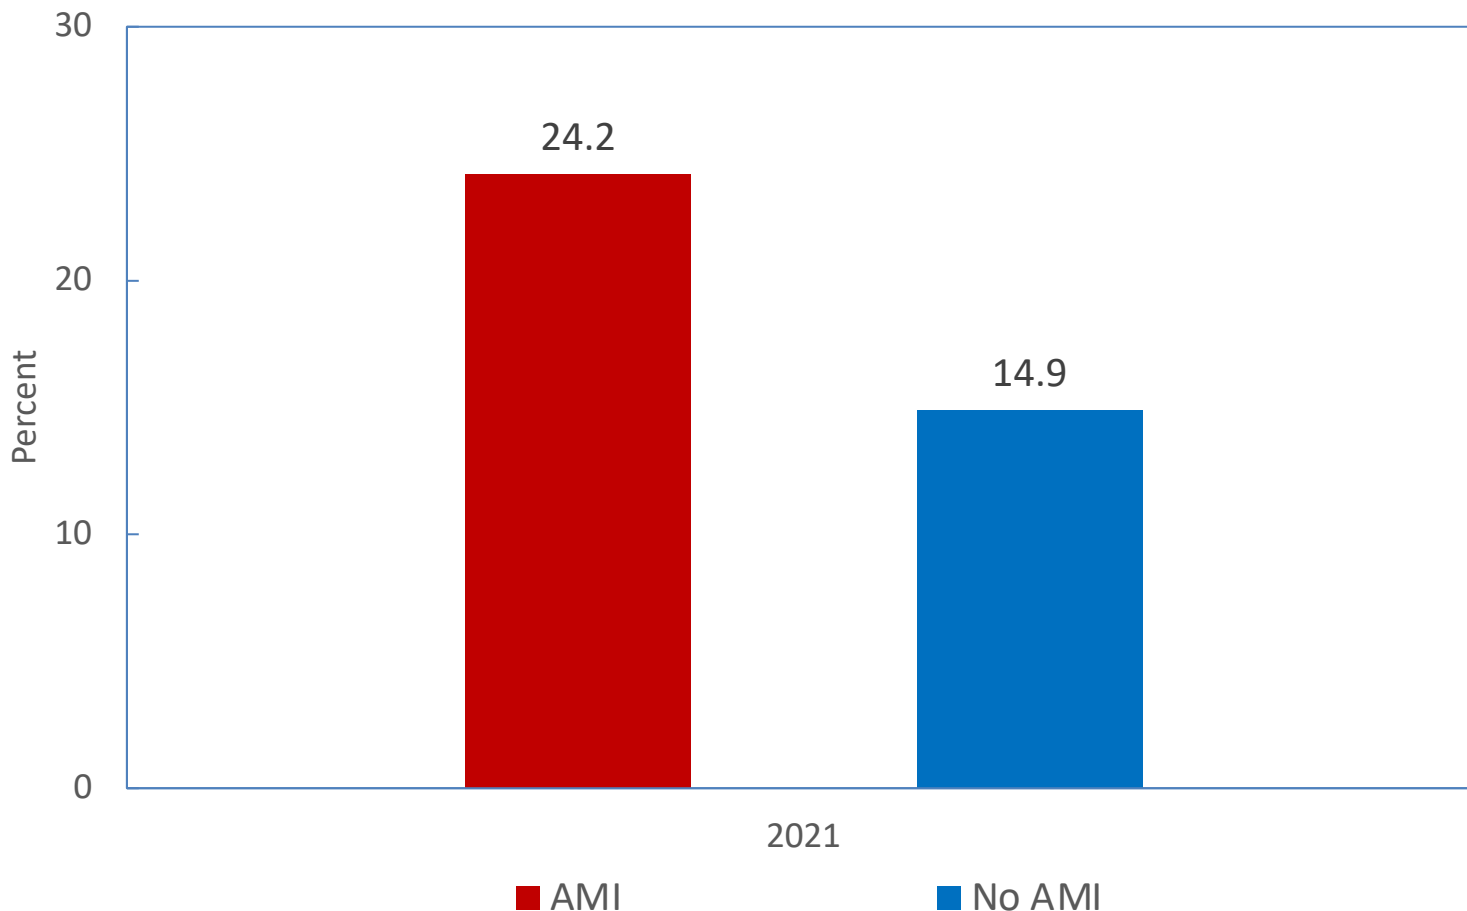

Current Smoking is defined as any cigarette use in the 30 days prior to the interview date.

Behavioral Health Condition includes Any Mental Illness (AMI) and/or Substance Use Disorder (SUD).

Note: Substance use disorder (SUD) estimates in 2021 are based on criteria from the Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-5). Estimates based on multimode data collection in 2021 are not comparable with estimates from 2020 or prior years.

Current Smoking Among Adults (Age ≥ 18) With Past Year Any Mental Illness (AMI): NSDUH, 2021

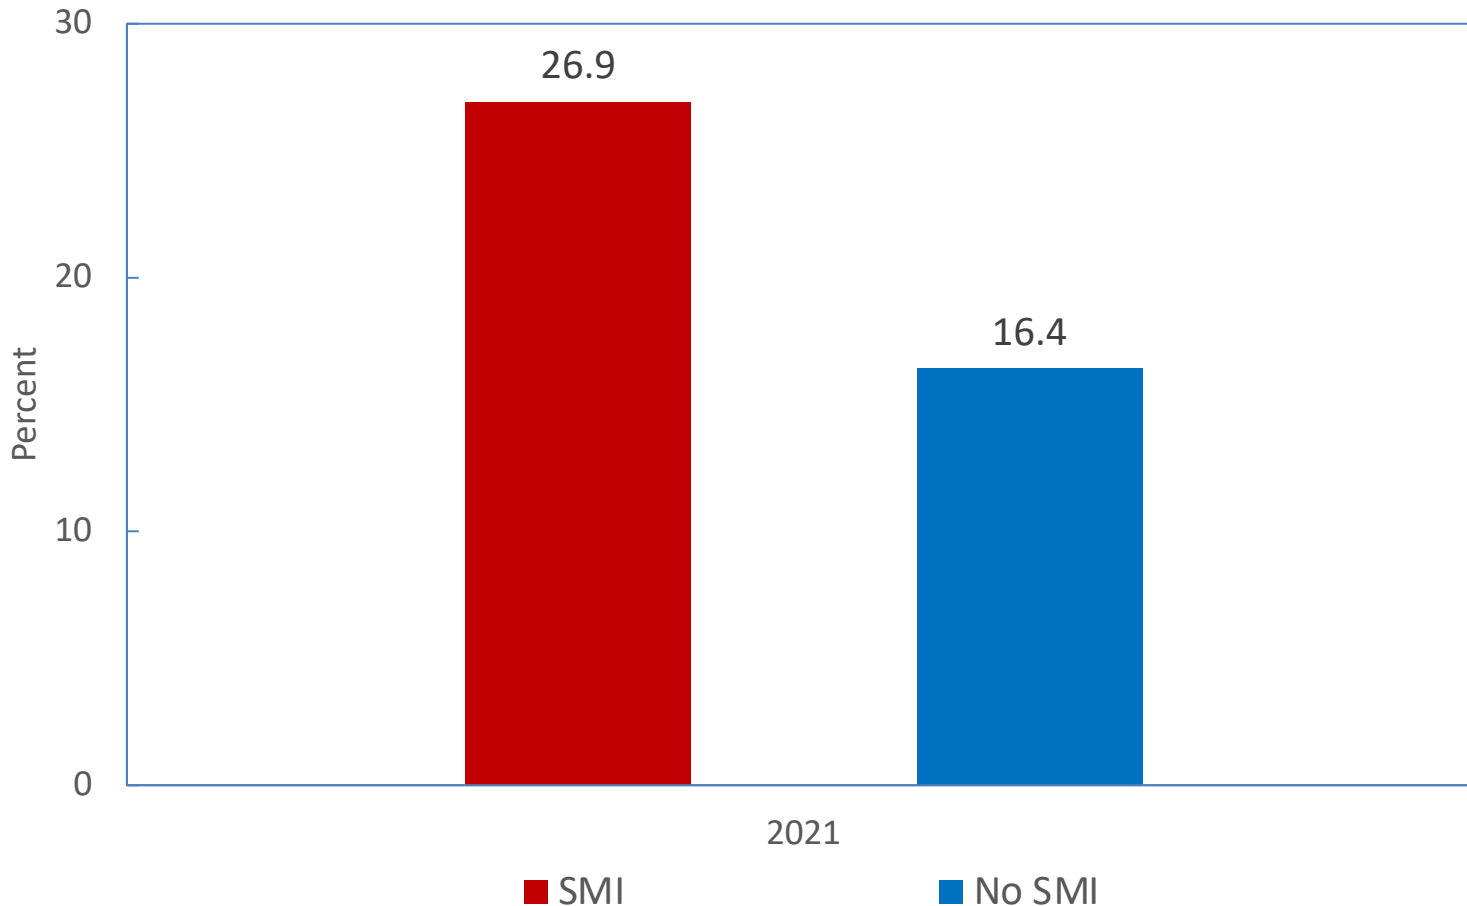

Current Smoking is defined as any cigarette use in the 30 days prior to the interview date.

Any Mental Illness is defined as having a diagnosable mental, behavioral, or emotional disorder, other than a developmental or substance use disorder, based on the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-IV).

NOTE Estimates based on multimode data collection in 2021 are not comparable with estimates from 2020 or prior years.

Current Smoking Among Adults (Age ≥ 18) With Past Year Serious Mental Illness (SMI): NSDUH, 2021

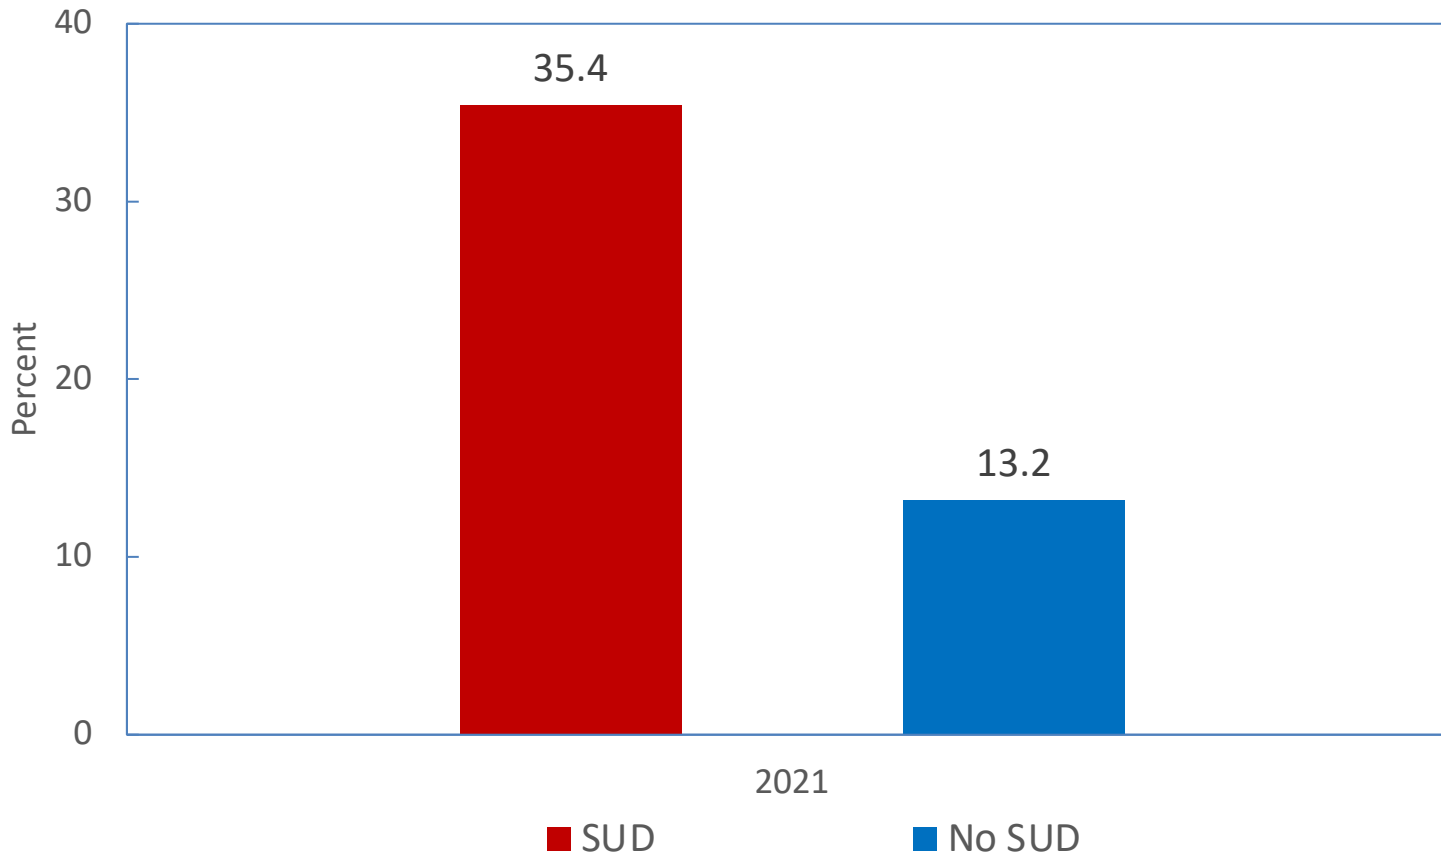

Current Smoking is defined as any cigarette use in the 30 days prior to the interview date.

Serious Mental Illness is defined as having a diagnosable mental, behavioral, or emotional disorder, other than a developmental or substance use disorder resulting in serious functional impairment, based on the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders (DSM-IV)*.

NOTE: Estimates based on multimode data collection in 2021 are not comparable with estimates from 2020 or prior years.

Current Smoking Among Adults (Age ≥ 18) with a Past Year Substance Use Disorder (SUD): NSDUH, 2021

Current Smoking is defined as any cigarette use in the 30 days prior to the interview date.

Note: Substance use disorder (SUD) estimates in 2021 are based on criteria from the Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM-5). Estimates based on multimode data collection in 2021 are not comparable with estimates from 2020 or prior years.
